

Welcome to my CD cover for the Suicide Muse project:)

Here is my inspirations for a cover layout of Suicide Muse

The title should be at the very top with one spill on the last letter- e- of the word "Muse"

The spill should start from the letter "e" of the word 'Muse'...that spills an almost heart-like shape, like this example:

We need an eye-catcher font and a complementary font.

We need one exciting font on top for the Song Title.

The eye-catcher is the song title (Suicide Muse), with the heart spill (please see sketched example :) and the complement is the artist name... GG Biobot, for which we can use a toned-down but authentic! - font like in this example:

And at last I would put some more orange-super-glossy lipstick on my lips.

All fonts we use need to be commercially applicable, because I will publish this CD Cover commercially.

Thank you sooo much for your wonderful artistic
contribution to this project 🦋 🦋 🦋 ❤️
